

8 AI Prompts to Plan Your Trip Without Overpaying

The Smarter Way to Travel — Powered by AI

By Tracy Williams • AI with Tracy

Stop researching for hours. Stop overpaying.
Let AI do the heavy lifting so you can enjoy the journey.

Section 1: Find Destinations

Let AI match you with destinations that fit your budget — not the other way around.

PROMPT 1

"Based on a budget of \$[X], suggest 5 destinations with the best value for travel, including average costs for flights, hotels, food, and activities."

■ *Tip: Replace [X] with your actual total budget. Be specific — AI gives better results with real numbers.*

PROMPT 2

"Compare these destinations based on affordability, safety, weather in [month], and overall experience for a [solo traveler / couple / family]."

■ *Tip: Add your travel style for personalized results. Backpacker ≠ luxury traveler.*

Section 2: Optimize Travel

Find the cheapest dates, routes, and hidden savings most travelers miss.

PROMPT 3

"Find the cheapest travel dates for [destination] within the next 6 months. Include shoulder season recommendations and any upcoming holidays that affect pricing."

■ *Tip: Shoulder season = the sweet spot between peak and off-season. Best value, fewest crowds.*

PROMPT 4

"Suggest alternative nearby airports or routes to reduce cost for a trip from [your city] to [destination]. Include bus/train options from alternative airports."

■ *Tip: Flying into a nearby city + a cheap train ride can save hundreds.*

Section 3: Plan Like a Local

Skip the tourist traps. Experience your destination the way locals do.

PROMPT 5

"Create a 3-day itinerary for [destination] focused on local experiences, not tourist traps. Include morning, afternoon, and evening activities with estimated costs."

■ *Tip: Ask for neighborhood-specific suggestions for the most authentic experience.*

PROMPT 6

"List hidden gems and affordable food options locals love in [destination]. Include street food, local markets, and restaurants where tourists rarely go."

■ *Tip: The best meals are almost never in the guidebook. AI can surface what locals actually recommend.*

Section 4: Budget Control

Know exactly what you'll spend before you book a single thing.

PROMPT 7

"Break down a full travel budget for a [X]-day trip to [destination] under \$[X]. Include flights, accommodation, food, transport, activities, and a contingency fund."

■ *Tip: Always add 10-15% contingency. Unexpected costs are the #1 budget killer.*

PROMPT 8

"Suggest ways to reduce costs on this trip without sacrificing experience. Include free activities, discount passes, and money-saving travel hacks for [destination]."

■ *Tip: Many cities have free walking tours, museum-free days, and city passes that bundle savings.*
